

South Carolina Electric and Gas Company – 2019 Spring Limb Pruning

In the spring of 2019 the South Carolina Electric and Gas Company will begin right of way trimming of trees in the proximity of the overhead transmission and distribution power lines on Sullivan's Island.

The contractor will be required to follow SCE&G trimming specifications outlined by ANSI-A300 standards and ISA guidelines. The contractor shall assign a "top trimmer/foreman" with each crew and the SCE&G arborist shall be available for consultation. The contractor shall remove debris daily. A representative from SCE&G shall be available to address any matters of concern from residents.

Project dates will be communicated when available from SCE&G. Attached is a map of the proposed work area on Sullivan's Island. Also visit <https://www.sceg.com/for-my-home/manage-my-service/landscaping-tree-trimming/rights-of-way> for information about SCE&G trimming and pruning practices.

Please contact Andy Benke with any questions at abenke@sullivansisland-sc.com or (843) 883-5726.
